

SELECT Appli-Web Plus TUTORIAL

1. Trace appliqué pattern onto paper side of Appli-Web Plus. (Remember to reverse/mirror pattern if necessary)

2. Fuse traced appliqué pattern to the wrong side of your chosen fabric, paper side up. Allow piece to cool before handling.

3. Cut out appliqué pieces.

4. Remove Appli-Web Plus from the appliqué pieces. A straight pin is a great assist when separating paper backing from fabric.

5. Position appliqué pieces onto base fabric, right side of fabric up and fusible side down. Fuse into place.

6. Continue with your favorite stitch down method, using Quilters Select Tearaway to stabilize your stitches.
